Mid-semester review for Geology 202
Fall 2002, Dr. King

This exercise is totally optional, but I would appreciate as much feedback as possible to evaluate how the class is going. You can turn your responses in as anonymously as you feel comfortable. You can email them to me (obviously not very anonymous), turn them into to me in class, put them in my mailbox in the department office (206 Felmley), or slip it under my door late at night.

Again, think of these responses as a way to change how class is conducted for the remainder of the semester and also to make things better for future students in my class. These responses come directly to me and not to any department committee so these are not the formal evaluation forms. You will have the formal department evaluations to fill out at the end of the semester.

1. Have I helped you learn in this course? What methods have worked best for you?

2. Has this course met your goals and expectations?

3. Have you enjoyed this course?

4. What specific recommendations would you give the instructor for improvement?

5. Any other comments about the instructor or the class?
